EDUCATION

University of Washington

Expected June 2028

Bachelor of Science in Computer Science and Software Engineering

Bothell, WA

- **GPA: 3.99/4.00** | Dean's List
- **Relevant Courses:** Data Structures & Algorithms, Object-Oriented Programming, Discrete Math, Calculus I–III

EXPERIENCE

NSF REU Undergraduate Research Intern

June 2026 – Present

LRDC FACET Lab, University of Pittsburgh

Pittsburgh, PA

- Selected as **1 of 7** students from a nationally competitive NSF-funded REU program to conduct research in AI, intelligent tutoring systems, robotics, and human-computer interaction under the mentorship of Dr. Erin Walker
- Developing a configurable multi-agent **LLM** platform in **Next.js** where students teach Cora, an adaptive AI persona with swappable models and customizable prompts, enabling structured learning-by-teaching interactions
- Designing agent-style prompting systems for controlled dialogue progression and adaptive student input handling
- Contributing to a gestural entrainment study on a **NAO** robot by engineering prompt-based **NLP** methods to isolate gesture-likely words, evaluating how synchronized human-robot interactions affect student engagement

Software Engineer

Feb 2026 – Present

Startup Club @ UW

Bothell, WA

- Developed the core chatbot orchestration layer, coordinating user requests, conversation-state management, and company-enrichment workflows to automate company discovery and personalized LinkedIn/email outreach
- Shipped TextbookFinder, a **React/Vite** app integrating Open Library API to help students find affordable textbooks, contributing search, filtering, and book detail features on a team of **10+** engineers

Undergraduate Researcher

April 2026 – Present

Sensors, Energy, and Automation Laboratory (SEAL)

Seattle, WA

- Conducting undergraduate research at UW Seattle's SEAL Lab, developing and evaluating LLM-powered automation workflows for research proposal generation, document processing, and academic task orchestration

Technical Lead

Jan 2026 – June 2026

Beta Alpha Psi @ UW

Bothell, WA

- Architected and deployed chapter web platform with **20+** pages and integrated member portal serving **200+** members; engineered multi-method payment system driving **40%** engagement increase
- Sole technical lead managing deployment, features, and production issues for **200+** active members

PROJECTS

[Rize](#) | *Next.js, Supabase, Stripe, Anthropic API, LaTeX* | [GitHub](#) | [Live](#)

- Built full-stack resume platform with customizable templates, visual editing, and LaTeX PDF generation
- Engineered LaTeX rendering pipeline enabling code-free resume customization and export
- Integrated authentication, ATS analysis, subscriptions, and AI-assisted content generation

[JengaBench](#) | *Python, Mesocosm* | [GitHub](#) | [Live](#)

- Built a 3D Jenga physics benchmark environment using PyBullet with constrained actions and deterministic simulation design for evaluating LLM spatial reasoning and embodied planning
- Tested GPT-4, Claude, and Gemini on Mesocosm platform, earning Top 3 in SWECCathon competition

ACTIVITIES & LEADERSHIP

Content Creator & Community Builder

May 2021 – Present

YouTube / TikTok / Discord (@SweFreeze)

- Scaled content platform to **50K+** followers and **34M+** combined views across YouTube and TikTok
- Founded and operate **750+** member Discord community with custom bot integrations and automated moderation

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript, TypeScript, HTML/CSS, SQL

Frameworks & Libraries: React, Next.js, Tailwind, Supabase, Stripe, Auth0

Developer Tools: Git, GitHub, Vercel, Docker, VSCode, IntelliJ IDEA, AWS EC2
