EDUCATION

University of Washington

Expected June 2028

Bachelor of Science in Computer Science and Software Engineering

Bothell, WA

- **GPA: 3.97/4.00** | Dean's List
- **Relevant Courses:** Data Structures & Algorithms, Object-Oriented Programming, Calculus I–III, Physics

EXPERIENCE

LRDC FACET Lab, University of Pittsburgh

June 2026 – Present

NSF REU Undergraduate Research Intern

Pittsburgh, PA

- Selected as 1 of 7 students from a nationally competitive NSF-funded REU program (~6% acceptance rate)
- Building a multi-purpose teachable agent: an **LLM**-powered system where students teach the AI, with focus on prompt engineering and system design grounded in conversational agent research under Dr. Erin Walker
- Contributing to gestural entrainment study on a NAO robot, exploring how synchronized gesture patterns between human and robot affect learning interactions at the intersection of robotics, HCI, and AI

Sensors, Energy, and Automation Laboratory (SEAL)

April 2026 – Present

Undergraduate Researcher

Seattle, WA

- Contributing to W3 website redesign using **Next.js** and **Tailwind** for the SEAL research group at UW Seattle
- Assigned to Agentic Proposal Pipeline exploring **LLM**-based automation for research workflows

Beta Alpha Psi @ UW

Jan 2026 – Present

Technical Lead, Web Platform

Bothell, WA

- Architected and deployed chapter web platform with 20+ pages and integrated member portal serving 200+ members; engineered multi-method payment system driving 40% engagement increase
- Serve as chapter's sole technical lead; manage deployment, implement features, and resolve issues on a rolling basis

Startup Club @ UW

Jan 2026 – Present

Software Engineer, Engineering Team

Bothell, WA

- Build and ship production software for real client engagements as part of a student-run engineering team, contributing across full-stack web applications and AI-powered tooling at various stages of the development lifecycle
- Work with a team of 10+ engineers on end-to-end feature development, pull request reviews, and production deployments, coordinating across branches and maintaining code quality through iterative Git workflows

PROJECTS

Rize | *Next.js, Supabase, Stripe, Anthropic API, LaTeX* | 🐙 [GitHub](#)

- Building full-stack AI resume builder with **LaTeX**-compiled resume generation, AI-powered bullet rewriting, and ATS scoring across tiered subscription plans
- Integrated **Anthropic API** for content generation, **Supabase** for authentication and data persistence, and **Stripe** for subscription payment processing

JengaBench | *Python, Mesocosm* | 🐙 [GitHub](#) | 🔗 [Live](#)

- Built LLM benchmark evaluating whether models genuinely learn Jenga strategy when taught by a student; tested Claude, GPT-4, and Gemini on a reproducible scoring platform — **Won Top 3, SWECCathon 2026**

ACTIVITIES & LEADERSHIP

Content Creator & Community Builder

2021 – Present

YouTube / TikTok / Discord (@FreezeXero)

- Scaled content platform to **50K+** followers and **34M+** combined views across YouTube and TikTok
- Founded and operate **750+** member Discord community with custom bot integrations and automated moderation
- Built freelance video editing client base delivering motion graphics and post-production work over 4+ years

TECHNICAL SKILLS

Languages: Java, Python, C++, JavaScript, HTML/CSS, SQLite

Frameworks & Libraries: React, Next.js, Tailwind, Streamlit, Anthropic Claude API, JDA

Developer Tools: Git, GitHub, Vercel, Docker, VSCode, IntelliJ IDEA, Cursor
